DETERMINATION OF CONSTANTS IN KINETICAL
EQUATIONS. [1963] 10p 8refs
Order from OTS, SLA, or ETC \$1.10 TT-64-14437

Trans. of Zhurnal Fizicheskoi Khimii (USSR)
1963, v. 37 [no. 3] p. 517-525. (Abstract available)

DESCRIPTORS: *Kinetic theory, Catalysts, Catalysts,
Adsorption.

A kinetic method is proposed for determining all the constants of an equation with commensurate rates for all the elementary processes of the contact catalytic reaction. A general method for determining the absolute adsorption coefficients and the rate constants for the Ealandin equation is described. An equation is derived for the relative adsorption coefficients for uniform and linearly non-uniform surfaces and a method is proposed for determining these coefficients for the active centers of a catalyst.
